

Antenna for WLL – 0,6 m

Technical Characteristics

Reflector	Solid
Frequency range	2,4 – 2,5 GHz
Diameter	0,60 m
Input impedance	50 ohms
Input power	100 Watts
Half power angle	12,2°
Gain	22 dBi
Front to back ratio	better than 26 dB
VSWR	1,2:1
Polarization	Linear
Frontal exposed area	0,28 m ²
Weight	7 Kg
Connectors	N female / N male

Parabolic Antenna 60cm for link - 2,4 GHz
Horizontal pattern for the horizontal polarization – Half power angle: 12,2°

Parabolic Antenna 60cm for link - 2,4 GHz
Horizontal pattern for the vertical polarization – Half power angle: 11°
